

I am

Doctor /
Analyst

I'm trying to

Find if the patient
has Diabetic
Retinopathy

But

Delay in detection may
lead to permanent loss
of vision.

Because

Initially, diabetic retinopathy
may not manifest any
symptoms or may only result
in minor vision issues.

Which makes me feel

A Deep Learning model for
Fundus Image Analysis for Early
Detection of Diabetic
Retinopathy which
prevents any later complications
